Education

NIT Rourkela

B.Tech.+M.Tech. (Dual Degree), Mining Engineering and Remote Sensing

Rourkela, Odisha

Nov. 2022 – June 2027

Salt Lake School (E.M)

10+2 High School Education

Kolkata, West Bengal

April 2008 – June 2022

Experience

Undergraduate Research Intern

May 2025 – August 2025

IIT Kharagpur

Kharagpur, West Bengal

- On-site internship entitled 'Embedded Systems Design and Coding' under [Professor Arabinda Routray](#) at IIT Kharagpur during the mentioned period. I worked on "Contactless Monitoring of Human Vitals and Emotions" based on fluctuations in heart rate, respiratory rate, and other vital parameters, determined through non-invasive biomarkers using **FMCW radar and thermal camera images**. It helps to improve the monitoring of vitals by boosting the **rate of screening by 70%**. [Project Certificate](#)

Undergraduate Research Assistant

August 2024 – September 2025

NIT Rourkela

Rourkela, Odisha

- Worked on **C-NMC 2019 cancer dataset** on Acute Lymphoblastic Leukaemia classification based on **Convolutional Vision Transformer model**, modified with Sparse Self-Attention Block, Squeeze and Extraction block and DropBlock for regularisation. This research aims to develop a **lightweight DL model with high accuracy (more than 95%)** and integrated on a Raspberry Pi for screening and portability. It has the potential to **reduce preliminary diagnostic time by over 80%, lower screening costs by 60–80% compared to conventional laboratory workflows**, and expand early leukaemia detection coverage to rural and tier-2/3 regions.

NeurIPS 2024 Conference Participant

April 2024 - July 2024

Online Competition

Leash BELKA Dataset- Kaggle Challenge

- Participated in the **NeurIPS 2024 "Predict New Medicines with BELKA" competition** to develop machine learning models for predicting small molecule-protein binding affinity, a critical step in accelerating drug discovery. Implemented various methodologies, including **ChemBERTa, Boosting models, single-dimension CNNs, decision trees, and ensemble techniques**. Achieved a **top 5 per cent rank on the public leaderboard** and a score of **0.26367 in private test data**, and we ranked among the **top 12 per cent of the overall participants**. [Leaderboard](#)

Projects

GlobeTrotter | *HTML, TailwindCSS, NextJS, Express JS, MongoDB, OpenAI API, PyTorch, Python*

August 2025

- Built a **scalable multi-city travel planning platform** at **Odoo Offline Finale Hackathon (Gandhinagar)** using Next.js, RESTful services, MongoDB, LLM integrations, and PyTorch intelligence for automated trip creation, smart activity suggestions, budget forecasting, interactive timeline views, and shareable plans. According to market metrics, it **reduces itinerary planning effort by nearly 80%, two times increase in return user rate, and improves budget reliability by 3 times**. Ranked **Top-20 out of 400+ teams**, highlighting strong system design, data modelling, and AI-powered product execution. [Project Repository](#) and [Prototype](#)

Cervello | *HTML, TailwindCSS, FastAPI, OpenAI API, Qdrant, MongoDB, PyTorch*

March 2025

- Developed a **real-time RAG application using OpenAI API and Qdrant vector DB** that enables enterprises to deliver instant, proactive support by automating knowledge retrieval and **ticketing—cutting support resolution time by 50–70%, reducing manual support workload by up to 60%, and improving customer satisfaction (CSAT) by 30%+** for large-scale user bases. Secured **2nd position at HackFest 2025 at IIT(ISM) Dhanbad** with **TEAM NITROUS**. [Project Repository](#)

Technical Skills

Languages: Java, Python, JavaScript, HTML/CSS, SQL

Frameworks: SpringBoot, ReactJS, LangChain, PyTorch, PostgreSQL, MongoDB, FastAPI

Developer Tools: MS Excel, Power BI, GitHub, Git, Linux, Docker, Maven, Postman

Leadership / Extracurricular

Vice President

May 2025 – Present

Machine Learning for Everyone

NIT Rourkela

- Organise hackathons, build AI/ML projects, drive research and open-source, and conduct sessions on AI development.
